1. Propose

The purpose of the STR document we are doing, is to gather and summarize all the tests we performed and the results we received following the test. The document will be arranged in a structured way and divided into categories in order to convey in an orderly and clear manner the bugs we found to Domino's developers.

2. Application Overview

The proposed of Domino's Pizza App aims to provide customers a convenient and seamless way to order their favorite pizzas and other menu items. The application can be downloaded through the google store on android devices and through Apple Store on iPhone devices .The App is enhance the overall customer experience by offering a user friendly and simple interface and a range of features that make ordering fast, easy to operate, and personalized customer preferences.

3. Testing Scope

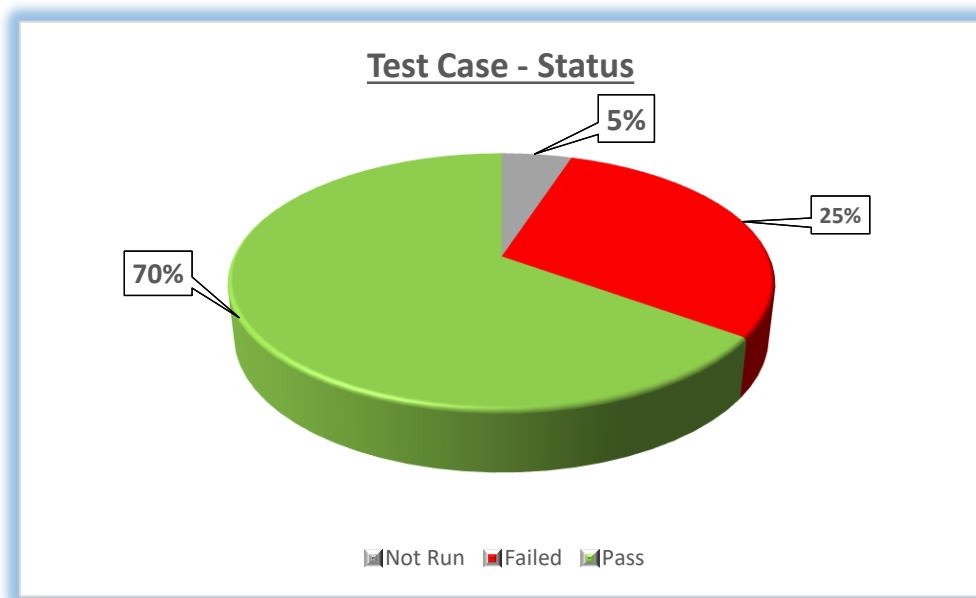

In our testing scope we made for the Domino's Pizza App we first checked the main functions that without them the application cannot work as expected. We checked as well the most common functions that we thought would be used by the end users. Then we tried to cover various aspects such as usability, security, and performance to verify they meet the expected standards

DEFECT DISTRIBUTION

5. Types of testing preformed

These are the type of tests we performed to make sure the App works properly :

- a. **Functionality Testing**: Verify that all features and functionalities of the App are working as intended. ordering pizzas, customizing toppings, adding/removing items, selecting drinks checking out and more.
 - b. **Sanity testing**: Quickly verifying that the most critical functionalities are working as expected.
 - c. **Usability Testing**: Testing the user interface and user experience to ensure it is intuitive, easy to navigate, and user-friendly, Checking for consistency in design elements, layout, and color schemes across the App.
 - d. **Compatibility Testing**: Testing the app on various devices, operating systems, and browsers to ensure compatibility and proper functionality across different platforms (iOS, Android).
 - e. **Performance Testing**: Evaluating the app's response time, speed, and scalability under different user loads to ensure it can handle peak usage times without performance degradation.
 - f. **Security Testing**: Identifying and fixing potential security vulnerabilities to protect customer data, payment information, and sensitive details on the App.
 - g. **Accessibility Testing**: Verify that the App meets accessibility guidelines, including support for screen readers, proper color contrast, and keyboard navigation.
 - h. **Localization and Internationalization Testing**: Ensuring the App is accessible to users with disabilities, following accessibility guidelines and standards.
 - i. **Load Testing**: Evaluating the App's performance under heavy user loads to identify and resolve potential Problems.
 - j. **Smoking Testing**: Conducting a quick set of tests to ensure critical functionalities are working before a more comprehensive test run.
-

6. Test Environment

We tested the application according to test areas including:

- a. Checking the "One click pizza" Area.
 - b. Checking the "הזמנה עם קופון" Area.
 - c. Checking the "הזמנה רגילה" Area.
 - c. Checking the "סל קניות" Area.
 - c. Checking the "מעקב אחר הזמנה" Area.
 - c. Checking the "אזור אישי" Area.
-

7. Recommendation

- a. Cancellation of 2 advertisements that appear after loading the application.
 - b. Allows to view the meal menu item without entering a delivery address
 - c. The images that appear on the home page should be links, so that they can be ordered by clicking on them.
 - d. Place the login option in a visible place on the home page.
 - e. Improve the page for filling out details for delivery so that the results will be compatible with the search - if you search for a city that start with the "A" letter, only the that begin with the letter A will appear.
 - f. Improve the page for filling out details for delivery so that clicking on the city and street fields will open a menu that shows all the available options.
 - g. Making sure to write a uniform text without spelling errors, without jumps in the ceremony, unequal spaces.
 - h. Improving the loading time of the pages on the site
-

8. Conclusion

Following the tests we performed on the Domino's Pizza App in order to verify that the application works as expected, we found a large number of bugs issues. However, except one critical bug in the personal area that doesn't allow to registering with a new user name for the application from an Android device, the severity of the rest of the bugs are range between major to low level and allows the customer to continuous work normal in most of the functions that the site contain .

At the bottom line - The customer can make any order he wants from the existing menu.

As a result, I recommended releasing the App.

9. Bug List

1. [TI-1](#) An advertisement window pops up while loading the application including Unnecessary features.
2. [TI-2](#) Unable to register with new username to the Application.
3. [TI-3](#) The registration window does not appear on the home page and is difficult to find
4. [TI-4](#) Unable to insert correct street name to delivery from "בארות יצחק"
5. [TI-5](#) Submitting job applications without prior conditions.
6. [TI-6](#) Incorrect street name to delivery on "אודים" city.
7. [TI-7](#) It is not possible to place an order with delivery to the city of Herzliya.
8. [TI-8](#) Search results are not displayed according to the letter entered
9. [TI-9](#) The same street name appears twice in the search results ("מ" letter).

10. [TI-10](#) The same street name appears twice in the search results ("ב" latter).
 11. [TI-11](#) There is an option to chose only one streed name in "אורה" city.
 12. [TI-12](#) A black window that enlarges the text is opens while I scroll up and down at the hybrid part of the App.
 13. [TI-13](#) Text slides out from the white frame
 14. [TI-14](#) Black text on black background.
 15. [TI-15](#) An accessibility icon remains on the side of the screen while scrolling.
 16. [TI-16](#) Unequal spaces in text.
 17. [TI-17](#) Unequal font size .
 18. [TI-18](#) The accessibility page is not responsive.
 19. [TI-19](#) There is no prevention to make an order to an address that doesn't exist.
 20. [TI-20](#) There is no option the change the street,house number fields After performing an action of returning to the previous page.
 21. [TI-21](#) The delivery fee is counted as a product in the shopping cart.
 22. [TI-22](#) Incorrect street name to delivery on "אלישמע" city.
 23. [TI-23](#) On the page for chosing the delivery hour, the last hour shown doesn't follow the others.
 24. [TI-24](#) The image of the meals on the home page are not links and cant be chosen.
 25. [TI-25](#) A missing image in the drink menu.
-

10. Bug Report

[TI-25] A missing image in the drink menu. Created: 02/Aug/23 Updated: 02/Aug/23	
Status:	To Do
Project:	Domino's App-Tzach&Ilan
